## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18 and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Binette et al (6,561,928). Binette discloses a golf ball comprising a core, an inner cover layer, and an outer cover layer. The inner cover layer can be made from ionomers or non-ionomeric materials such as polyethylene copolymers (col. 23). The inner cover layer may also include graphite as a filler.

### ***Response to Arguments***

After further consideration the indicated allowability of claims 18 and 20-22 is withdrawn. Claim 18 is broad enough to include all types of graphite. While it is clear the term "foil" may be limiting applicant is required to provide a clear explanation with respect to any differences. The term 'foil' defines sheets, however since applicant claims the graphite foil includes a polymer binder, the graphite does not appear to be in sheets (see spec).

***Allowable Subject Matter***

Claims 1, 5-17, and 23 are allowed.

Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
